McClarin Plastics Inc. Ranks Among North America's Top Thermoformers!

HANOVER, PA – July 13, 2006 – McClarin Plastics, Inc. of Hanover, PA is among the largest thermoforming companies in North America, according to a dollar-based ranking published recently in *Plastics News*. Among heavy gauge industrial thermoformers, McClarin Plastics, Inc. is ranked eleventh in the nation.

Thermoforming is a relatively small but increasingly important segment of a plastics product manufacturing industry that in North America alone generates sales of over \$7 billion a year. The process involves heating a thermoplastic sheet to a working temperature and then forming it into a finished shape through the application of heat or pressure.

For more information on McClarin Plastics, Inc., call (717) 637-2241.

This information was compiled as part of the twelfth annual ranking of thermoformers by *Plastics News*; a weekly newspaper based in Akron, Ohio, that reports on the business of the plastics industry. *Plastics News* is published by Crain Communications Inc., whose portfolio includes thirty trade and consumer publications, including *Automotive News*, *Advertising Age*, *BtoB*, *Rubber & Plastics News* and *Waste News*. This ranking and others are also available online at www.plasticsnews.com.
